Advice from Eton Conservation Area Advisory Committee: 30.09.2017

Re 11 Provost Road: 2017/5074/T:

We have looked at the application to fell the two trees in the front garden at 11 Provost Road and replace them with "extensive planting plan including semi-mature tree(native species)"; we have also inspected the front garden.

The larger tree to the left of the front elevation (T1 -native species crab apple) is rather attractive and appears to be healthy. It should be retained.

The smaller tree to the right of the front elevation (T2 being - Fuchsia) appears to be a poor specimen and we have no objection to it being replaced with something similar.

Yours sincerely,

Eton CAAC
