1.0 EXECUTIVE SUMMARY

Site Location	14 Eton Road, London, NW3 4SS														
Client	Mr. Robert Leeming														
Proposed Development	Proposed includes the renovation of the four-storey house, including the re-laying of the lower ground floor with a new build up, extensions to the side, front and rear and to demolish and rebuild the separate garden room so that it is approximately 700m lower than the existing with a final FFL changing from +45.29mSD to +43.75mSD.														
Historic and Current Activities	From historical map evidence, it would appear that the site was first built on prior to 1871, with the garden room at the rear of the property being constructed between 1970 and 1972. The surrounding area has been residential throughout its history, although some industrial sites including a garage and railways have been present within the area.														
Environmental Setting	<p>The 1:50000 Geological Survey of Great Britain (England and Wales) covering the area (Sheet 256, 'North London', Solid and Drift Edition) indicates the site to be underlain the London Clay Formation at depth.</p> <p>The Bedrock geology underlying the site has been classified as Unproductive Strata.</p> <p>A Zone II (Outer Protection Zone) is evident 150m to the south-west of the site.</p> <p>There are 11 water abstraction licences within 1 kilometre of the site. The closest is located 748m to the south of the site with the abstraction of water for Public Water Supply: Potable Water Supply-Direct from groundwater. The permitted start date for this licence is 1st April 2013.</p> <p>The closest surface water feature is a canal located 597m south-east of the site. Due to the distance from the site, this not considered to be vulnerable to potential contaminants that may be present on-site.</p> <p>The site is currently not located within 1 kilometre of an area at risk from extreme flooding from rivers or sea without defences (Zone 2) or an area at risk from rivers or sea without defences (Zone 3).</p> <p>There is one sensitive land issue within 1 kilometre of the site. This is located 769m to the north of the site and relates to Local Nature Reserve.</p> <p>There are no landfills within 1 kilometre of the site.</p>														
Previous Investigations	There are no previous relevant investigations known to us at this time.														
Conceptual model	<table border="1"> <thead> <tr> <th>Potential Adverse Effect</th> <th>Specific Regime</th> <th>Action Required</th> </tr> </thead> <tbody> <tr> <td>The proposed basement extends beneath the water table surface.</td> <td>Subterranean (Groundwater) flow</td> <td>Further action required – Further investigation</td> </tr> <tr> <td>There a history of seasonal shrink-swell subsidence in the local area and/or evidence of such effects at the site.</td> <td>Slope Stability</td> <td>Further action required – Further investigation</td> </tr> <tr> <td>The proposed basement will significantly increase the differential depth of foundations relative to neighbouring properties.</td> <td>Slope Stability</td> <td>Further action required – Further investigation</td> </tr> </tbody> </table>			Potential Adverse Effect	Specific Regime	Action Required	The proposed basement extends beneath the water table surface.	Subterranean (Groundwater) flow	Further action required – Further investigation	There a history of seasonal shrink-swell subsidence in the local area and/or evidence of such effects at the site.	Slope Stability	Further action required – Further investigation	The proposed basement will significantly increase the differential depth of foundations relative to neighbouring properties.	Slope Stability	Further action required – Further investigation
Potential Adverse Effect	Specific Regime	Action Required													
The proposed basement extends beneath the water table surface.	Subterranean (Groundwater) flow	Further action required – Further investigation													
There a history of seasonal shrink-swell subsidence in the local area and/or evidence of such effects at the site.	Slope Stability	Further action required – Further investigation													
The proposed basement will significantly increase the differential depth of foundations relative to neighbouring properties.	Slope Stability	Further action required – Further investigation													

2.0 INTRODUCTION

2.1 Project Objectives

At the request of StructureMode, working on behalf of Mr Robert Leeming a Geotechnical Desk Study Report was carried out to establish whether there is any potential for adverse effects due to the proposed development on the local geology, hydrogeology and hydrology surrounding the site.

The scope of the investigation was outlined in the SAS Limited quotation reference Q10159-3, dated 11th July 2017.

The project objectives include the following aims:

- To assess the local geology, hydrogeology and hydrology in relation to the site.
- To identify further works, if any, needed to further assess, manage or mitigate any potential adverse effects.

2.2 Scope of works

A preliminary risk assessment comprising a desk study and site survey has been undertaken and is summarised as follows:

1. A review of current activities and conditions at the site based on information from the Client, regulatory data and the results of a site walkover survey.
2. A review of the history of the site and surrounding area from historical maps and available anecdotal information.
3. An assessment of geological, hydrological and hydrogeological information pertaining to the site.
4. Recommendations for further works, if necessary.

The recommendations and comments given in this report are based on the information contained from the sources cited and may include information provided by the Client and other parties including anecdotal information. It must be noted that there may be special conditions prevailing at the site which have not been disclosed by the investigation and which have not been taken into account in the report. No liability can be accepted should such conditions alter the recommendations made in this report.

2.3 Details of research undertaken

A number of database searches have been undertaken, soliciting information of the current and historical uses of the site and surrounding area in order to complete a qualitative risk assessment associated with the development of the site. These include:

- Environmental Data Search 1:10000
- Environmental Data Search 1:2500
- Site Sensitivity Maps and Data Sheets
- Historical Maps
- Consultation with the Client / Architect / Site representatives
- Google Search

2.4 Report Limitations

This report is prepared for Mr. Robert Leeming (herein called the 'Client'), for purposes agreed and in accordance with the terms and conditions set out in the Agreement between Site Analytical Services Limited and the Client.

This report refers, within the limitations stated, to the condition of the site at the time of the inspections. No warranty is given as to the possibility of future changes in the condition of the site.

The comments given in this report, and the opinions expressed herein, are based upon the readily available information collated for the report.

This report has been prepared for the sole use of the Client for the purposes described and no extended duty of care to any third party is implied or offered. Third parties using any information contained within this report do so at their own risk.

The accuracy of any map extracts cannot be guaranteed. It is possible that different conditions existed on-site, between and subsequent to the various map surveys appended.

Whilst the report may express an opinion on possible configurations of strata between or beyond exploratory holes discussed or on the possible presence of features based on visual, verbal or published evidence, this is for guidance only and no liability can be accepted for its accuracy.

There may be other sources of information not included in those listed that hold data relevant to the Desk Study undertaken at the site that could materially affect the conclusions made in this report.

This report is prepared and written for the use stated herein; it should not be used for any

other purposes without reference to Site Analytical Services Limited. The report has been prepared in relation to the proposed end-use and should another end-use be intended a further re-assessment may be required.

2.5 Confidentiality, Copyright and Reproduction

This document has been prepared by Site Analytical Services Limited in connection with a contract to supply goods and/or services and is submitted only on the basis of strict confidentiality. The contents must not be disclosed to third parties other than in accordance with the terms of the contract.

Site Analytical Services Limited accepts no responsibility whatsoever to third parties to whom this report, or any part thereof, is made known. Any such party relies upon the report at their own risk.

3.0 SITE DETAILS

(National Grid Reference: TQ277844)

3.1 Site Location

14 Eton Road is a residential property, located on the north-western side of Eton Road, Belsize Park at approximate postcode NW3 4SS. The residential dwelling has four levels of accommodation; lower ground, ground, first and second floor. The residential property also comprises a one storey garden room within the properties rear garden.

The site covers an approximate area of 0.05 Hectares with the general area being under the authority of the London Borough of Camden.

The site location map is presented in Appendix A of this report.

3.2 Current use of the site and surrounding land uses

The site is currently a residential dwelling. The site is located on the north-western side of Eton Road with residential properties to the north-east and west and a roadway to the south and east.

A current site plan is presented as Figure 1 in this report.

3.3 Site Walkover

The site was attended on 29th August 2017 for the purposes of conducting the site walkover. The site photographs have been included within Appendix B.

Current use of the site Semi-detached four storey residential property, with a single storey garden room in the rear garden.
Structures or past structures Brick built four storey property with a hip roof, with a single storey flat roofed garden room in the rear garden.
Site covering The front and rear gardens of the property are predominately soft landscaped (front - grass lawn / rear - AstroTurf). A hard landscaped path leads to front door the rear garden. A hard landscaped area is evident around the footprint of the garden room
On site Vegetation Various shrubs, and potted plants surrounding the perimeter of the site. 4 small sized trees are apparent in the properties front and rear garden.
Site topography The rear garden is raised by 3 feet. A raised area is also evident at the front footprint of the garden room.
Potential Contamination Sources None noted
Visual or olfactory signs of contamination None noted
Drainage / services or past services There is not considered to be a significant potential from on-site drainage / services to cause contamination on site. There are not any obvious preferential pathways resulting from the presence of services that may connect possible contamination on site with receptors on and / off site.
Water courses No water courses were noted on-site.

From the walkover there are no potential sources of contamination on the site which appears to be a well maintained residential property.

3.4 Details of intended future uses of the site

At the time of reporting of August 2017, the proposed includes the renovation of the four-storey house, including the re-laying of the lower ground floor with a new build up, extensions to the side, front and rear and to demolish and rebuild the separate garden room so that it is approximately 700mm lower than the existing with a final FFL changing from +45.29mSD to +43.75mSD.

The proposed development plan has been provided in Figure 2.

3.5 References of planning applications

There are no recent planning applications with reference to the site on the London Borough of Camden planning portal.

4.0 ENVIRONMENTAL SETTING

4.1 Anticipated Geology

The 1:50000 Geological Survey of Great Britain (England and Wales) covering the area (Sheet 256, 'North London', Solid and Drift Edition) indicates the site to be underlain the London Clay Formation at depth.

4.1.1 London Clay

London Clay comprises a stiff grey fissured clay, weathering to brown near surface. Concretions of argillaceous limestone in nodular form (Claystones) occur throughout the formation. Crystals of gypsum (Selenite) are often found within the weathered part of the London Clay and precautions against sulphate attack to concrete are sometimes required.

4.1.2 Historical Boreholes

The British Geological Survey maintains an archive of historical exploratory borehole logs throughout the UK. SAS Limited has searched the database and have found that there is 1 borehole located within 150m of the site. This is located 75m to the south-east of the site and reveals Made Ground to a depth of 1.50m with the London Clay to the full depth of excavation at 10.0m.

The records of the British Geological Survey indicate the following:

Ground Stability Hazard	Risk Assessment
Collapsible Ground	Very low
Compressible Ground	No hazard
Ground Dissolution	No hazard
Landslide	Moderate
Running Sand	No hazard
Shrinking or swelling clay	Moderate
Coal Mining	Not affected

4.2 Hydrogeology

4.2.1 Groundwater

The Environment Agency Groundwater Protection Policy uses aquifer designations that are consistent with the Water Framework Directive. These designations reflect the importance of aquifers in terms of groundwater as a resource (drinking water supply) and also their role in supporting surface water flows and wetland ecosystems.

The Bedrock geology underlying the site has been classified as Unproductive Strata; rock layers or drift deposits with low permeability that have negligible significance for water supply or river base flow.

The approximate elevation of the site was ~41.8m AOD (Above Ordnance Datum).

The anticipated groundwater flow direction on-site was to the east, due to the wider topography of the land.

An Unproductive Aquifer designation was noted on site and therefore controlled water is not considered to be vulnerable to potential contaminants that may be present on-site.

Considering the thickness of London Clay, it is considered that the potential for pollutants, if present, to interact with the underlying Chalk aquifer would be minimal.

Any works or development, which may have an impact on surface water, aquifer or groundwater quality, must be approved by the Environment Agency prior to implementation.

4.2.2 Water Abstractions

A Zone II (Outer Protection Zone) is evident 150m to the south-west of the site.

There are 8 non-potable water abstraction licences within 1 kilometre of the site.

There are 3 potable water abstraction licences within 1 kilometre of the site.

The closest is located 748m to the south of the site with the abstraction of water for Public Water Supply: Potable Water Supply- Direct from groundwater. The permitted start date for this licence is 1st April 2013.

The water abstractions listed are not considered to be vulnerable to potential contaminants that may be present on-site.

4.3 Hydrology and Drainage

The closest surface water feature is a canal located 597m south-east of the site. Due to the distance from the site, this not considered to be vulnerable to potential contaminants that may be present on-site.

The site is currently not located within 1 kilometre of an area at risk from extreme flooding from rivers or sea without defences (Zone 2) or an area at risk from rivers or sea without defences (Zone 3).

4.4 Sensitive Land Use

There is one sensitive land issue within 1 kilometre of the site. This is located 769m to the north of the site and relates to Local Nature Reserve.

5.0 INFORMATION ON SITE HISTORY AND LOCAL INDUSTRY

5.1 Present Use and Activities

There are no entries in the contemporary trade directories on-site, there are 9 within 250m of the site, 56 within 500m and 152 within one kilometre of the site.

There are 5 fuel stations recorded within 1 kilometre of the site. The closest is located 435m to the east of the site at 81-85 Chalk Farm Road, Chalk Farm, London, NW1 8AR and its status is currently described as 'obsolete'.

There are no Control of Major Accident Hazards (COMAH) sites, Explosive sites, Notification of Installations Handling Hazardous Substances (NIHHS), Planning Hazardous Substance Enforcements or Planning Hazardous Substance consents within 1 kilometre of the site.

There are 20 local authority pollution prevention and controls found within 1 kilometre of the site. The closest relates to dry cleaning and is located 230m to the north-west of the site at 48 England's Lane, London, NW3 4UE. The status of the site has been classified as 'permitted'.

5.2 Landfill Sites and Waste

There are no BGS recorded landfill sites located within 1 kilometre of the site.

There are no recorded historical landfill sites located within 1 kilometre of the site.

There are no local authority recorded landfill sites located within 1 kilometre of the site.

There are 4 registered radioactive substances within 1 kilometre of the site. The closest is located 995m to the south of the site at the Zoological Society of London, Regents Park, London, NW1 4RY and relates to the disposal of radioactive waste. The status of this substance is described as 'superseded'.

There are no licensed waste management facilities (location) within 1 kilometre of the site.

There are no licensed waste management facilities (landfill boundaries) within 1 kilometre of the site.

There are no integrated pollution control registered waste sites within 1 kilometre of the site.

There are no registered waste transfer sites within 1 kilometre of the site.

There are no waste treatment or disposal sites located within 1 kilometre of the site.

5.3 Land raising or land filling

There is no evidence of any addition land-raising or filling of historical features (e.g. ponds, streams, small quarried, depressions, etc.) within 250m of the site which is not a landfill site as detailed above.

There are no obvious burial sites within 250m of the site.

5.4 Pollution Incidents and Discharge Consents

There have been two pollution incidents to controlled waters within 1 kilometre of the site. The closest is located 513m to the south-east of the site. The pollutant is stated as Oils- Unknown, with the incident described as Category 3 (Minor Incident). This incident is dated 17th December 1998.

There have been 4 discharge consents to controlled waters within 1 kilometre of the site. The closest is located 813m to the south-east of the site and relates to the discharge of Trade Discharges- Cooling Water into the Grand Union Canal. The status of this consent is described as 'transferred'.

There are no integrated pollution controls within 1 kilometre of the site.

5.5 Historical Maps

The site history was compiled from information available from a Landmark Envirocheck Report consisting of a series of past Ordnance Survey maps (scale 1:1,250 and 1:2,500 which are presented in Appendix C).

Date	Description of Site Use	Surrounding Site Use
1871-1875	<p>The site comprises a property which has been constructed prior to this date.</p> <p>The site is bound to the south-east by a roadway (Eton Road), which was constructed prior to this date.</p>	<p>The surrounding areas to the site are predominantly residential, although recreational areas are present to the north-west.</p> <p>Two ponds are apparent 90m to the north and 255m to the south of the site.</p> <p>Multiple railway lines are evident 120m to the south of the site.</p>
1896	The site remains essentially unchanged.	The entirety of the sites surrounding areas are now residential.
1915-1916	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1935	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1946 Aerial Photograph	The site remains essentially unchanged.	

		The surrounding area remains essentially unchanged.
1954	The site remains essentially unchanged.	<p>A garage is evident 170m to the north-west of the site.</p> <p>Two studios are apparent 205m and 210m to the north of the site.</p> <p>Multiple ruins are evident 170, 180m and 195m to the south-west and 35m to the south of the site.</p> <p>An electrical sub-station is apparent 240m to the south of the site.</p> <p>The railway lines are shown to have expanded with numerous sidings details 120m south of the site.</p>
1954-1955	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1955	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1963-1969	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1970	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1972-1975	A property has been constructed within the sites north-western perimeter.	An electrical sub-station is apparent 230m to the north of the site.
1973-1974	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1978-1990	The site remains essentially unchanged.	Two electrical sub-stations are apparent 180m to the south-west and 235m to the east of the site.
1985-1987	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.

1988	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1991	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1991-1994	The site remains essentially unchanged.	An electrical sub-station is apparent 235m to the north of the site.
1994-1995	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1995	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1996	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
1999- Aerial Photograph	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
2007	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.
2017	The site remains essentially unchanged.	The surrounding area remains essentially unchanged.

5.5.1 Historical summary of site

Date	Site Development
1871-1972	The site comprises a property. The site is bound to the south-east by a roadway (Eton Road).
1972-2017	A property has been constructed within the sites north-western perimeter.

From historical map evidence, it would appear that the site was first built on prior to 1871, with the garden room at the rear of the property being constructed between 1970 and 1972. The surrounding area has been residential throughout its history, although some industrial sites including a garage and railways have been present within the area.

5.6 WW2 Unexploded Ordnance Potential

Historical Building Plans Information regarding the site indicated that there have been 8 areas cleared due to enemy action within 1 kilometre of the site. The closest is located 567m to the east of the site.

The 'Bomb Sight' archive has identified areas within 150m of the site that have previously been targeted by WW2 bombings. Therefore, it should be considered that UXO may pose a risk to the site.

5.7 Historical Industrial Data

Historical Building Plans Information reveal that there are no above "ground fuel tanks" within 1 kilometre of the site.

Historical Land Use Information has indicated that there were 21 Potentially Contaminative Industrial Uses located within one kilometre of the site, with 6 of these found 250m from the site. This relates to a hospital located 45m to the north-west of the site, dated 1991. The closest four relate to railways and are located 109m, 136m, 160m and 161m to the south and are dated from 1874 to 1991. The remaining two relate to air shafts and are located 185m to the south and 208m to the south-west of the site and are dated from 1991.

Historical Land Use Information has indicated that there are 3 Potentially Infilled Land (Non-Water), located within 1 kilometre of the site. The closest is located 799m to the north-west of the site and relates to Unknown Filled Ground (pit, quarry etc.) dated from 1996. It has revealed that there are 3 Potentially Infilled Land (Water) located within 1 kilometre of the site. The closest is located 959m to the south-east of the site and relates to Unknown Filled Ground (pond, marsh, rover, stream, dock etc) dated from 1951.

There are no Historical Tanks and Energy Facilities within 1 kilometre of the site.

6.0 CONSULTATION WITH THE LOCAL AUTHORITY, THE ENVIRONMENT AGENCY, ETC.

Consultation with the Local Authority was undertaken via the council's online planning portal and archives.

Consultation with the Environment Agency has not been undertaken, however the Environment Agency have been cited within the information of the Envirocheck report with reference to groundwater, surface water, authorised processes and licenced waste management issues.

There was no additional consultation with other bodies/sources undertaken.

British waterways were not consulted regarding navigable rivers and canals and English Nature were not consulted regarding ecological systems, however their databases have been cited within the information of the Envirocheck report.

7.0 REVIEW AND SUMMARY OF PREVIOUS REPORTS

There have not been any previous reports available to us at the time of writing.

8.0 DEVELOPMENT CONCEPTUAL MODEL

The following possible adverse effects have been identified in the conceptual site model below:

Potential Adverse Effect	Specific Regime	Action Required
The proposed basement extends beneath the water table surface.	Subterranean (Groundwater) flow	Further action required – Further investigation
There a history of seasonal shrink-swell subsidence in the local area and/or evidence of such effects at the site.	Slope Stability	Further action required – Further investigation
The proposed basement will significantly increase the differential depth of foundations relative to neighbouring properties.	Slope Stability	Further action required – Further investigation

9.0 SUGGESTED NEXT STEPS

The information from the site conceptual model has identified a number of potential adverse effects on the surrounding area due to the proposed development.

Dependent on the scope of the proposed works on-site, it may be necessary to fully assess the potentially adverse effects on the local groundwater, surface water and slope stability regimes, for which additional information would be required. We would suggest that the most viable method of assessment would be via a Basement Impact Assessment (Site Investigation) and the investigation would have the following objectives:

- Provide information for further characterisation of the site in relation to local groundwater, surface water and slope stability regimes.

An intrusive investigation may reveal on-site sources of adverse effects that were not established by the Desk Study and Site Walkover, and thus require modification of the conceptual model.

9.1 Proposed Further Site Works

The proposal is a geotechnical Intrusive Site Investigation in order to obtain further information about the site conditions.

Geotechnical Site Investigation

The purpose of the geotechnical investigation will be to obtain data regarding engineering properties of the soils to enable the design of foundations, concrete, pavements and drainage. The works to be undertaken on the site would comprise (a) soil sampling, (b) drilling boreholes at selected locations within the site and to establish foundation design parameters.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Historical Map List	4
Useful Contacts and Further Information	6

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Historical Building Plans Information

This data set contains potentially contaminative features such as asbestos, petrol, oil and tanks captured from Historical Building Plans. The Historical Building Plans were produced by the London-based firm Charles E. Goad Ltd. as fire insurance plans, dating back to 1885. The firm ceased production of fire insurance plans in 1970. Most of the important towns and cities of the British Isles are covered. Historical Building Plans are usually at the scales of 1:480 (1 inch to 40 feet) for the British Isles. They were updated every 5-6 years by means of revision sheets designed to be pasted on to the original plans.

It should be noted that Historical Building Plans are only available for certain major towns and cities and in some cases there may only be partial coverage of the search area. It cannot therefore be assumed that the absence of responses under the Historical Building Plans section of this report indicates that no hazards exist. Please check the Historical Building Plans Map List table in the Historical Map List section of this report to establish if Historical Building Plans are available for this search area.

Historical Land Use Information

Landmark's Historical Land Use Data is the result of combined analysis of historical map data captured at 1:10,560 and 1:10,000. A unique comprehensive database of Historic Land Use from the 1840's to 1996 it includes 67 different types of potentially contaminated past industrial land use. This entailed analysing over 60,000 maps and is drawn from at least four, and up to six historical map editions. In addition a seventh layer was also created, known as the land use layer, containing areas of infilled land which are plotted via comparison between two or more map editions.

Historical Tanks and Energy Facilities

In addition to HLU, additional analysis uncovered some of the most dangerous sources of contamination (past and present tanks, petrol storage, oil, gas, electricity, miscellaneous facilities). This data set covers over 390,000 Historical Tanks and Energy facilities in Great Britain and was captured from post war 1:2500 and 1:1250 Ordnance Survey historical mapping covering a period from 1943 to 1996.
