2017/5119/P	South Kentish Town Conservation Area Committee	-	03/10/2017 13:16:31	COMMNT	The application should more fully acknowledge the heritage of this site - built along the main high street of Kentish Town, perhaps in the 1830, with 'French' window to the first floor (but no longer balconied) and valley roof. To this end, while adding an extra floor with dormer windows is reasonable, and will enable improvement, there should be a requirement to replace all front aspect windows with hard wood sashes and casements - there are many local firms that can do this well, rather than the aluminium frames proposed.
