2017/4932/P	Diana Fox	52 Compayne Gardens NW6 3RY	12/10/2017 18:59:40	COMMNT	I do not think that it is in keeping with the green and lush nature of the local environment - which we all prize - to erect a living space in the garden of this property. If permission is granted for this addition, then the trend will likely spread and we will significantly reduce the prized greenspace in the area. These large gardens are unique for London. They should be honoured and not viewed as building plots.
2017/4932/P	Christopher Gardner	Flat1 48 Compayne Gardens London NW6 3RY	13/10/2017 09:54:55	COMMNT	<p>I was very worried to see that this application has appeared again even though the proposed building is slightly smaller than before.</p> <p>I am objecting to this on the same grounds as the original application. I would like to underline what I said before.</p> <p>I have lived in Compayne Gardens since the 1960s and one of the most attractive features of the area is the quiet, open green space behind the houses, which is extremely unusual for London.</p> <p>If the council allows this accommodation to be built, we will lose part of this wonderful green space. It will inevitably mean noise, light pollution and people coming in and out at all times. This will harm my enjoyment of living here, especially in the back rooms of the flat, which are where I spend most of the time.</p> <p>As has happened at other properties in the area, although thankfully not yet in this part of the street, so-called garden rooms can easily be turned into separate flats, which just increases the disruption. Otherwise, why would it have a kitchen and bathroom as part of the design? How could you stop someone living there full-time?</p> <p>This is supposed to be a conservation area and surely if that means anything it means conserving the green space.</p> <p>I am extremely worried that if this is allowed to go ahead it will be the thin end of the wedge and the council would then have no reason to stop these buildings going ahead in all the gardens.</p> <p>Approving this application would be the beginning of the end for the unique character of this area.</p> <p>The smaller size does not change that at all.</p>
