| 2017/5311/P     | Ms lisa robins   | 22<br>St. Augustines<br>Road<br>NW1 9RN<br>NW1 9RN<br>NW1 9RN | 17/10/2017 10:41:55 | OBJ      | <p>I object to these proposals. This road is in a conservation area and the traditional boundary feature is a brick wall built of london stocks. What is being proposed here (and in fact has already been built!) is a faux grandiose italian villa type scheme which is completely out of keeping with the area and defeats the point of designating a conservation area.</p> <p>I have lived in this road for 27 years and all houses except this one have been maintained in keeping with the tone of the road, the fact that the houses are victorian and with consideration to the principles of conservation (even, I should add, houses owned by Camden Council).</p> <p>It this scheme is allowed it makes a mockery of conservation. Imagine what the road would look like if all the houses create two entrances with ornate railings etc?</p> <p>I urge the council to stand up to amateur developers such as this who think they can effectively do what they want.</p> <p>Please refuse this permission and more importantly, insist that the front is reinstated with a brick wall and only one entrance.</p> |
