2017/5426/T	Elsa Nelson	13 Belsize Grove flat 1 NW3 4UX	28/10/2017 11:13:39	OBJ	Building management have already destroyed 3 Elder trees that screened massive Gillan Hall from my property and provided food for wildlife at no threat to structures. Camden refused just such an application with more severe threat and damage at my previous home at 2 Maresfield Gardens, now successfully underpinned. Loss of two or more of these large trees will further devastate the tree-lined aspect of Belsize Grove, named for its beautiful vegetation. I strongly oppose taking down these trees and exort Camden to follow its own previous advice to me and refuse felling and recommend regular canopy reduction and underpinning. Yours sincerely, Elsa Nelson
2017/5426/T	Consuelo Phelan, hon. Tree Officer, BRA.	54 Belsize Park NW3 4EE	28/10/2017 02:02:03	COMMNT	Although they do not look in the best of condition at present, I believe it would be a great shame to lose these trees, especially as there are no street trees nearby to offer the shade, habitat for birds and other wildlife that they provide. Their loss would have a considerable detrimental effect on the streetscape, also. The report mentioned damaged drains. Perhaps the problem might be alleviated if these were properly repaired? On behalf of the Belsize Residents' Association, I should like to object to this application.
