**Subject:** Re: Tree application - 2017/6054/T - 70 Canfield Gardens

Thank you for this Tony

The Prunus at this address has one stem that is dead, and the remainder of the tree was showing significant die back and sparse foliage during the past growing season. It is felt by the owner and his representative that replacing the tree is a preferable option to preserving it at this stage (during the imminent planting season), given its prominent location close to the property.

Kind regards

Gareth
