

Acquario

Planter

The Bellitalia Acquario Planter is rectangular in shape and features gently rounded corners. Manufactured from reinforced precious stone concrete, the walls of the planter are at least 70mm thick with a base of 500mm. The inner side walls have four galvanised steel axle boxes set into the concrete and connected to the steel reinforcement. M16 eyebolts may be fixed to these to make it easier to install and move the planter. The planter is also available with levelling adjustable feet.

Granite Polished

Granite Sandblasted

KEY BENEFITS:

- Choice of 7 precious stone colours or white granite
- Coordinates with products from the wider precious stone collection
- Sandblasted finish
- Optional extras include an anti-graffiti coating

ACQUARIO PLANTER

Modular, rectangular and monolithic planter manufactured from concrete, equipped with drainage holes.

MATERIAL

The planter can be manufactured using the precious stone colour palette or from white granite conglomerate.

REINFORCING

The planter is reinforced and fitted with lifting eyes in the bottom of the planter for handling.

FINISHING

The planter is completely sandblasted and then covered with a transparent anti-decay coating, or, upon request, with nanotechnology and/or anti-graffiti products. All edges are rounded or made blunt.

INSTALLATION

Simply place the planter on the floor.
