2017/5908/P	Alison Little and John Emery	7 Alma Street NW5 3DJ	13/11/2017 21:44:28	COMMEM AIL	We are concerned to see that this rather aggressive, angular, modern design is distinctly unsympathetic in terms of all the neighbouring buildings: at the very least, we would have hoped to see arches to echo those over the windows on the front fascias of the rest of no. 5 and no. 6, and toning red brick. The windows seem disproportionately large.
2017/5908/P	C.J.Legge	10 Willes Road LONDON NW5 3DS	10/11/2017 11:43:06	COMMNT	<p>Anglers Lane has a particular and historically interesting architectural style dictated by 5-8. This building destroys that cohesion and should not be allowed.</p> <p>. The vast windows are totally out of character even to the rear of the Lidl building adjacent which are bad enough.</p> <p>.They will overlook directly the houses and community centre opposite to the detriment of their value.</p> <p>The building façade should be brick .</p> <p>That it is adjacent and overlooks but some how not part of the conservation area, does not allow such a discordant proposal to destroy the preservation of such a characterful Lane.</p> <p>While the site may be appropriate for a new home, please do not allow a design that would destroy further the continuity and appeal of this old part of Kentish Town's history.</p>
