2017/5413/L	Ed Laws	Centre Point House	21/11/2017 13:34:32	OBJ	What times will the fit out be constructed - this creates noise and vibrations in the building and we have suffered enough from this evil development badly over seen by the inept Camden Council. I ask for no works at weekends or early mornings and no drilling and banging. Where is the refuse and when is it collected - again due to Camden Councils lack of basic duty of care to local residents it has killed a residential area and made us live in the mess of bars, cafe's and restaurants who through their functioning will cause residents a daily hell form deliveries, refuse collections large gatherings of people at the new transport hub. Camden council need to be investigated for gross lack of duty of care - any business taking on any unit here will be subject to daily scrutiny of every minutiae of operating regulations by the residents whole lives are being wrecked by the cosy alliance of big business (Almacantar) and deficient public representatives (Camden Council)
