<b>Consultations</b>						
<b>Adjoining Occupiers:</b>	No. notified	<b>00</b>	No. of responses	<b>02</b>	No. of objections	<b>02</b>
<b>Summary of consultation responses:</b>	<p><u>A site notice was displayed on 11/01/2017 and expired on 01/11/2017.</u></p> <p>In response to the proposal, 2 objections were received from 13 Lymington Road and 19A Alvanley Gardens.</p> <p>Objections were made on the following grounds:</p> <ul style="list-style-type: none"> <li>• Object to this and all three other related applications by the same applicant.</li> <li>• Key reasons are those already raised by the Fortune Green and West Hampstead Neighbour Development Forum.</li> <li>• There is no evidence to suggest that any such kiosks are required or would be utilised and they will just become advertising hoardings blocking an already congested pavement.</li> <li>• This is a bad idea. The pavement is already too narrow for the number of pedestrians, particularly at rush hour.</li> </ul> <p>Metropolitan Police – Designing Out Crime Officer objects on the following grounds:</p> <ul style="list-style-type: none"> <li>• Telephone kiosks are no longer used for their original purpose due to the fact that nearly every person is in possession of some kind of mobile device thus negating the need to use fixed land line telephone. As a result of this the phone boxes in The London Borough of Camden have now become 'crime generators' and a focal point for anti-social behaviour (ASB).</li> <li>• My own previous experience of policing Camden highlights the above ASB, ranging from witnessing the taking of Class A drugs, urination, littering, the placing of 'Prostitute Cards' and sexual activities. All of which have occurred in telephone kiosks.</li> <li>• The introduction of the telephone kiosk will only increase the above ASB, as it conceals the activities of what is occurring inside the actual space and prevents police or passers-by seeing what or who is in there. This generates for the latter a fear of crime.</li> <li>• The extra lighting produced by the kiosk and the space it uses up in the public realm will also create an added distraction to an already cluttered street space. Any CCTV monitoring the area will be effected by this and therefore any crime prevention they produce is lost.</li> <li>• In addition, the area in which the planned phone box is suggested is an extremely busy location throughout the day and night due to passengers crossing over from the West Hampstead Thameslink Station to West Hampstead Tube Station. At times this area is heavily congested with pedestrian traffic and do come into conflict with road users. Adding another hazard to an already narrow foot path will create further issues during the rush hour and subsequent busy periods.</li> <li>• For the above reasons I object to this planning application</li> </ul>					

TfL objects on the following grounds:

- TfL understands from previous discussions with the Council and statements in the application materials that these proposals for a new phone box does not form part of a deal between the Council and BT to renew the entire BT phone box estate across the borough. They are therefore not contingent on removal of more than 1 phone box in exchange for the new unit proposed, leading to an overall reduction in phone boxes in the public realm across Camden. They would actually clutter the streetscape further.
- TfL is responsible for planning and securing the operation of bus services in the capital and most other public transport. In addition it plans and operates the cycle hire scheme and Cycle Superhighways, Quietways and other cycle routes. We are concerned about impacts on these transport services and infrastructure.
- The submissions lack detail such that it is difficult to assess the acceptability of each kiosk in terms of siting and appearance. There is no photo montage with the site marked out nor are there drawings showing the kiosks in the context of the footway and carriageway and existing trees, street furniture, signs and so forth. Furthermore there is no indication as to the orientation of each kiosk.
- TfL would expect the siting of any kiosk to comply with our Streetscape design guidelines. The covering letters submitted suggest this is the case and there is at least 3.3m clear footway width (excluding any private forecourt) and there is a minimum of 0.45m set back from the carriageway. However it is not possible to check this and nor is it clear whether any account is taken of trees, street furniture etc. On this basis TfL would object to prior approval being given on the grounds of failure to demonstrate that the siting meets safety and comfort guidance.
- TfL reminds the applicant and Council that the London Plan favours decluttering and simplifying the streetscape wherever possible (see policy 6.10) and this is also prioritised in TfL Streetscape Guidance (available from <https://tfl.gov.uk/corporate/publications-and-reports/streets-toolkit>). In addition we note that all the kiosks are proposed for locations in which there are already a number of existing phone kiosks in close proximity. There has been no evidence submitted as to the need for further provision of phone kiosks over and above those which exist already. We therefore also object to the principle of siting new phone kiosks in these parts of Camden.

Transport Strategy object as follows:

- This proposed location is a borough road that experiences extremely high flows of pedestrians.
- The Council is committed to improving the public realm and pedestrian environment in order to encourage more sustainable travel. The Council seeks to improve the pedestrian environment, as outlined in Policy T1 (points a and b). The above proposal would reduce footway space available to pedestrians, therefore not contributing towards improving the pedestrians environment and promoting sustainable transport by prioritising walking. Therefore, this application is contrary to Policy T1 and has been deemed unacceptable
- One of Camden's core objectives is to promote sustainable transport by means of walking and cycling. Introduction of additional street furniture that sees a reduction in footway width, and thus pedestrian

comfort, could in turn lead to the discouragement of travel by sustainable means.

- The proposed kiosk is located within an area of Camden that experiences high flows of pedestrian movement. As an absolute minimum guide to footway width, Camden refers to Appendix B in Transport for London's Pedestrian Comfort Guidance which notes that active and high flow locations must provide a minimum 2.2m and 3.3m of 'clear footway width' (respectively) for the safe and comfortable movement of pedestrians.
- The proposal would reduce the 'clear footway' to less than the thresholds as set out in TfL's Pedestrian Comfort Guidance document and has, therefore, been deemed as unacceptable and must be refused.
- Similarly, to Policy T1 point e), the proposed kiosk would act as a physical obstruction on the footway and would make it difficult for two wheelchairs and/ or prams to pass each other on the footway. Therefore, the proposal is unacceptable and must be refused.
- Development wishing to alter the existing layout of the public highway must design for Camden's road hierarchy giving pedestrians and cyclists priority above all other users. Any introduction of unnecessary street furniture and thus the removal of a permeable pedestrian environment, is seen to have a detrimental effect on pedestrian movement, specifically for vulnerable road users. Interrupting continuous stretches of public footways and increasing pedestrian journey time is unacceptable. With respect to the above points, the proposed telephone kiosk has been deemed as unacceptable and is recommended for refusal.
- Whilst the current proposal does not seek to introduce advertising at this stage, the potential for advertising on the rear panel of the kiosk raises concern. The Camden Streetscape Design Manual outlines advertising guidance that resists the introduction of commercial advertising. The proposals in that respect would be unacceptable as the suggested future use of these kiosks may be more for commercial advertising rather than for the benefit of the highway user.
- The enclosed nature of the proposed boxes raises concern with regards to antisocial behaviour.
- Additionally, it is unclear as to who would take financial responsibility if the proposed telephone box, if granted permission, would be required to be removed as a result of a committed scheme. Which party would pay for its removal or relocation?
- The above proposal is not in line with Camden Policies and, therefore, being recommended for refusal.

The Council's Access Officer objects as follows:

There are a number of requirements for an accessible phone booth that need to be considered. These are all taken from BS8300 (current addition).

- A fold down seat (450mm to 520mm high) or a perch seat (650mm to 800mm high) should be provided for convenience of ambulant disabled people. Drop down arms should be provided for each seat.
- Telephone controls on accessible telephones for wheelchair users should be angled so they can be used by people when seated or when using a perch seat.
- Telephone controls should be located between 750mm and 1000mm above the floor.
- To benefit blind and partially sighted people, telephones should be selected which have well lit keypads, large embossed or raised

numerals that contrasts visually with their background and a raised dot on the number '5'.

- Instructions for using telephones should be clear. They should be displayed in large easy-to-read typeface.

There should also be at least 1200mm, preferably 1800mm between the booth and any wall / guiding opposite.

<p><b>Local Groups:</b></p>	<p><u>West Hampstead Amenity and Transport (WHAT)</u></p> <p>Objects to the proposal on the following grounds:</p> <ul style="list-style-type: none"> <li>• We believe that Euro-payphone is abusing its OFCOM licence as a telecoms operator, as these kiosks are being installed purely for advertising purposes, as evidenced by the company website, which heavily promotes their use for advertising, and makes no mention of the telephone facilities offered. See <a href="http://europayphone.co.uk/">http://europayphone.co.uk/</a></li> <li>• West End Lane NW6, the proposed located for these kiosks, is already provided with two telephone kiosks, which is more than adequate for the small usage of payphones these days</li> <li>• West End Lane has narrow and congested pavements, used not just by many local residents walking to its three railway station, but by many thousands of passengers who change trains between the stations every day.</li> <li>• The proposed kiosks will cause obstructions of the pavement, and one in particular (2017/5429/P) will despoil a new small pedestrian square that has been created in the heart of West Hampstead, opposite Marks &amp; Spencer.</li> <li>• It is highly probable that these kiosks will become a focus for anti-social behaviour, including fly-tipping, drug dealing and possibly even prostitution.</li> <li>• Please note that although the applications make no mention of advertising, it is only by means of advertising that kiosks could be made financially viable, as the business model of Euro-Payphone appears to be purely based on advertising.</li> </ul> <p><u>The Fortune Green and West Hampstead Neighbour Development Forum</u></p> <p>Objects to the proposal on the following grounds:</p> <ul style="list-style-type: none"> <li>• The site is in the West Hampstead Growth area, in which key policies in the Neighbourhood Plan require increasing pavement space to permit safe passage for pedestrians between the interchange stations. This proposal will reduce pavement space which has been hard won from recent development.</li> <li>• The proposal will increase congestion and/or litter.</li> <li>• There is an existing under-utilised phone box 200 metres to the north of the proposed site, so there is no need for further provision.</li> <li>• It seems clear from looking at the proposers' website, <a href="http://europayphone.co.uk/">http://europayphone.co.uk/</a>, that this proposal is the first step in building an advertising panel, rather than for the provision of telecommunications.</li> <li>• No regard has been taken of the policies of The Fortune Green and West Hampstead Neighbour Development Plan.</li> </ul>
<p><b>Councillor Russell comments:</b></p>	<p><u>Councillor Russell has objected on the following grounds:</u></p> <ul style="list-style-type: none"> <li>• West End Lane can be a very cluttered and busy road. Along the street, there are various bus stops, advertising boards, litter bins and outdoor seating areas that take up street space, and adding to this there are already telephone kiosks along the stretch of road, which are not seemingly used by the public to make phone calls.</li> <li>• The street also has heavy pedestrian traffic, particularly around the station interchange. Adding additional clutter to the pavement would reduce the space on the street for pedestrians, and would be particularly harmful to those using wheelchairs, pushing prams or with</li> </ul>

luggage.

- I also note that the sites for the kiosk are in the West Hampstead Conservation area, the Appraisal and Management Strategy for which warns that the “street and pavements are overlaid with clutter”, including with “signs, barriers and advertisements”. These applications do not take account of the conservation area and the need to preserve the “village character” of West Hampstead, and so should be rejected
- The telephone kiosks would serve no meaningful purpose and in fact could have a detrimental impact on local residents by encouraging crime.
- As the Met Police has set out, across Camden these types of phone boxes have become “crime generators” and a focal point for anti-social behaviour, including: the taking of Class A drugs, urination, littering, the placing of ‘Prostitute Cards’ and sexual activities.
- I am extremely concerned that the introduction of four new telephone kiosks along West End Lane would encourage such anti-social behaviour. Therefore these applications should be rejected.

## Site Description

The application site comprises of an area of the footway adjacent to Unit 1, Hardy Building on the Western side of West End Lane. It is sited between two rail stations, it is 45m away from the entrance to West Hampstead tube station to the South East and 40m from West Hampstead Overground station which is on the same side of the street to the North. A bus stop is located opposite on the Eastern side of West End Lane.

The site lies within the West Hampstead Town Centre The site is not located within a conservation area and is not adjacent to any listed buildings.

## Relevant History

### Site history:

## Assessment

### **1.0 Proposal**

1.1 Confirmation is sought as to whether the installation of a telephone kiosk would require prior approval under Part 24 of Schedule 2 of the GPDO. The order permits the Council to only consider matters of siting and appearance in determining GPDO prior approval applications. The potential impact on crime and public safety are relevant considerations under siting.

1.2 The kiosk would measure 1.32m by 1.11m with an overall height of 2.45m, and would be located on the Western pedestrian footway along West End Lane, adjacent to West Hampstead Square.

1.3 It would have a powder coated metal frame with reinforced laminated glass on three sides, and a solar panel on the roof.

## 2.0 Assessment

2.1 Policy A1 states that the Council will seek to ensure development contributes towards strong and successful communities by balancing the needs of development with the needs and characteristics of local areas and communities, and that the Council will resist development that fails to adequately assess and address transport impacts affecting communities, occupiers, neighbours and the existing transport network. Paragraph 6.10 states that the Council will expect works affecting the highway network to consider highway safety, with a focus on vulnerable road users, including the provision of adequate sightlines for vehicles, and that development should address the needs of vulnerable or disabled users. Furthermore, Policy T1 point e) states that the Council will seek to ensure that developments provide high quality footpaths and pavements that are wide enough for the number of people expected to use them, including features to assist vulnerable road users where appropriate, and paragraph 8.9 of CPG7 (Transport) highlights that footways should be wide enough for two people using wheelchairs, or prams, to pass each other.

2.2 Camden's Streetscape Design manual – section 3.01 footway width states the following:

- “Clear footway” is not the distance from kerb to boundary wall, but the unobstructed pathway width within the footway;
- 1.8 metres – minimum width needed for two adults passing;
- 3 metres – minimum width for busy pedestrian street though greater widths are usually required;
- Keeping the footway width visually free of street furniture is also important, allowing clear sightlines along the street’.

2.3 All development affecting footways in Camden is also expected to comply with Appendix B of Transport for London's (TfL's) Pedestrian Comfort Guidance, which notes that active and high flow locations must provide a minimum 2.2m and 3.3m of 'clear footway width' (respectively) for the safe and comfortable movement of pedestrians.

2.4 Policy T1 states that the Council will promote sustainable transport choices by prioritising walking, cycling and public transport use and that development should ensure that sustainable transport will be the primary means of travel to and from the site. Policy T1 points a) and b) state that in order to promote walking in the borough and improve the pedestrian environment, the Council will seek to ensure that developments improve the pedestrian environment by supporting high quality improvement works, and make improvements to the pedestrian environment including the provision of high quality safe road crossings where needed, seating, signage and landscaping.

2.5 Policy T1 (Public Transport) states that where appropriate, development will be required to provide for interchanging between different modes of transport including facilities to make interchange easy and convenient for all users and maintain passenger comfort.

2.6 Paragraph 8.6 of CPG7 (Transport) seeks improvements to streets and spaces to ensure good quality access and circulation arrangements for all. Ensuring the following:

- Safety of vulnerable road users, including children, elderly people and people with mobility difficulties, sight impairments and other disabilities;
- Maximising pedestrian accessibility and minimising journey times;
- Providing stretches of continuous public footways without public highway crossings;
- Linking to, maintaining, extending and improving the network pedestrian pathways;
- Providing a high quality environment in terms of appearance, design and construction, paying attention to Conservation Areas;
- Use of paving surfaces which enhance ease of movement for vulnerable road users; and,
- Avoiding street clutter and minimising the risk of pedestrian routes being obstructed or narrowed e.g. by pavement parking or by street furniture.

2.7 Policy C5 requires development to contribute to community safety and security, and paragraph

4.89 of Policy C5 states that the design of streets needs to be accessible, safe and uncluttered, with careful consideration given to the design and location of any street furniture or equipment. Paragraphs 9.26 and 9.27 of CPG1 (Design) advise that the proposed placement of a new phone kiosk needs to be considered to ensure that it has a limited impact on the sightlines of the footway, and that the size of the kiosk should be minimised to limit its impact on the streetscene and to decrease opportunities for crime and anti-social behaviour.

### **3.0 Siting**

3.1 The application site is located on a pavement measuring roughly 5.8m wide. This area of the footway experiences extremely high pedestrian flows, particularly at peak times.

3.2 Section 3.01 of Camden's Streetscape Design Manual requires a minimum unobstructed pathway width within the footway, known as the 'clear footway'. This guidance and Appendix B of TfL's Pedestrian Comfort Guidance, outlines the recommended minimum footway widths for different levels of pedestrian flows.

3.3 Policy 9 (Pavements and Pedestrians) of the Fortune Green and West Hampstead Neighbourhood Plan outlines that development should 'provide safe and wide pavements, giving the maximum possible space to pedestrians'

3.4 The footprint of the proposed telephone kiosk measures 1.32m by 1.11m. Detailed design drawings that include the orientation and exact proposed positioning of the new telephone kiosk on the pavement have not been submitted and so it is unclear as to how wide the 'clear footway' width would be once the proposed telephone kiosk has been installed. However, Camden's Streetscape Design Manual section 4.01, together with TfL's Pedestrian Comfort Guidance, states that street furniture should be placed a minimum of 0.45m back from the carriageway, therefore the proposal would result in the loss of a minimum of 1.8m of the footway. This would reduce the 'clear footway' to less than the minimum threshold, which would reduce pedestrian comfort, resulting in overcrowding, issues highway safety through interfering with signals, visual obstructions, visibility splays and may lead to the discouragement of sustainable travel. As such, the proposal would be contrary to Policies A1 and T1 and is considered unacceptable.

3.5 There is one other existing telephone kiosk within approximately 184m of the site, which is located north of the site outside No. 223 West End Lane. No justification has been submitted for the need to install a further one. In addition to concerns about the infrequent use of telephone kiosks due to the prevalence of mobile phone use, it is considered that the proposed telephone kiosk would act only as a hindrance to pedestrian movement, adding further clutter to the streetscene rather than providing a public service for the benefit of highways users, contrary to Policy A1 of Camden's Local Plan (2017) and Policy 9 of the Fortune Green and West Hampstead Neighbourhood Plan (2015).

### **4.0 Design and Appearance**

4.1 Policy D1 of Camden's Local Plan aims to ensure the highest design standards for developments. Policy D1 states that the Council will require all developments to be of the highest standard of design and to respect the character, setting, form and scale of neighbouring buildings, its contribution to the public realm, and its impact on wider views and vistas.

4.2 Policy 2 (Design & Character) of the Fortune Green and West Hampstead Neighbourhood Plan outlines that all development shall be of a high quality of design, which complements and enhances the distinct local character and identity of Fortune Green and West Hampstead. Policy 9 (Pavements and Pedestrians) outlines that development should 'provide safe and wide pavements, giving the maximum possible space to pedestrians'.

4.3 The street furniture that presently exists on this section of the footway comprises necessary elements of street trees, public benches and a small clock tower. It is considered that the

introduction of a new telephone kiosk to this relatively clear section of footway would severely degrade the visual amenity of the area through the creation of unnecessary street clutter. Furthermore, due to its proposed location within 184m of one other existing telephone kiosk, it is considered that the proposed development would add to the over-proliferation of such structures and severely degrade the visual amenity of the area through the creation of further unnecessary street clutter.

4.4 The proposed structure is considered to be a very poor design in terms of size, scale, massing and proposed materials, and is not an appropriate or acceptable addition in this location. It would be an obtrusive piece of street furniture in this location detracting from the streetscene. The powder coated metal frame and reinforced laminated glass incongruous design would provide an intrusive addition to the street. As such, the proposal would fail to adhere to Policy D1 of Camden's Local Plan (2017) and Policy 2 of Fortune Green and West Hampstead Neighbourhood Plan (2015).

#### Access

4.5 Policy C6 requires new buildings, spaces and facilities that the public may use to be fully accessible to promote equality of opportunity. Although the proposed kiosk would allow for wheelchair users to 'access' the kiosk, this does not amount to the provision of a wheelchair accessible phone. The Council's Access Officer has highlighted that there are a number of requirements which need to be considered for an accessible phone booth, including the height of the telephone controls, which should be located between 0.75m and 1.0m above the floor. The telephone controls in the proposed kiosk would be located at a height of 1.5m above the floor, and so the proposed kiosk is considered unacceptable in terms of providing access for all, contrary to Policy C6.

### **5.0 Anti-social behaviour**

5.1 With regards to community safety matters, a number of issues have been raised by the Metropolitan Police Crime Prevention Design Advisor. In particular it has been noted that the area is currently experiencing an increase in crime and anti-social behaviour, and the design and siting of the proposal on a busy footway would further add to street clutter and safety issues in terms of crime and anti-social behaviour, through reducing sight lines and natural surveillance in the area, and providing a potential opportunity for an offender to loiter. The proposal would therefore be contrary to Policy C5 and CPG1 (Design).

### **6.0 Conclusion**

6.1 The proposal would result in unacceptable street clutter, harmful to the character and appearance of the streetscape and to the detriment of pedestrian flows, as well as creating issues with safety and poor accessibility. The proposal, by virtue of its siting and appearance, is considered unacceptable.

### **7.0 Recommendation**

7.1 Refuse Prior Approval
