2017/6045/P	Moshe Lahyani	Flat 4 62 Westbere Road London NW2 3RU	22/11/2017 22:15:30	OBJ	I was shocked to hear of this wholly inappropriate planning application for this huge, ugly, enclosed development on a much valued open space and had to look it up and write to object. I often walk my dog along Gondar Gardens and living in Westbere Road which suffers from excessive traffic, I appreciate the peace and quiet of being able to walk along the top of the hill, breathe some fresh air and hear the birdsong. Such things may sound trivial but add priceless quality of life for a city dweller. I am extremely concerned about the amount of traffic this development will obviously bring and am concerned that as it is not aimed at the local community but an exclusive group of incoming private residents (and I note there's no affordable housing proposed) that it will be of no benefit whatsoever to an established local community, and can only bring social and environmental damage. Why on earth would Fortune Green residents accept or be happy with that? I urge Camden to think first and foremost of its loyal residents rather than profit-seeking private enterprises with no interest or concern whatsoever for the local community, and see the obvious unsuitability of this proposal for this location and area, and reject it.
