Treatment Report

Client Name: Dropbox Basements
Address: 10-11 Kings Mews
London
Post code: WC1 2JP

Date: 11/10/2017
Job Number:
Type of Visit: IT

Problem on site: Rodent monitoring

Visit Summary

Three part treatment for rodents was started on this visit.

Bait stations was laid throughout the site to allow us to monitor and control any rodent activity. When inspecting the property and installing bait stations I found no evidence of any rodent activity happening.

We will follow up in approx. 7-10 days.

Recommendations:

Next Appointment: 7-10 days

Pesticides Used: Difenacoum 0.005% - 220g

Technician: Adam Williams
