RE: Planning Application 2017/5172/P
Mobile Phone Masts 1 Winifrede Paul House York Rise LONDON NW5 1DX

Dear Camden Council Planning,

We strongly object to the installation of a Mobile phone Base Station/masts on the roof of Winifrede Paul House. We are all literally meters away from this installation as are other homes and Acland Burghley the local secondary school is in the zone. None of us were consulted in Faraday House about these plans for the Masts, only we have found out after talking to other residents that made us aware of what is being put for planning approval.

We do not want this Mobile Phone Installation structure towering and dominating above our homes and the local area. The phone Masts will have radiating effects which we do not welcome or want coming into our homes. It's totally unacceptable that this is even being proposed when the long term effects of radiation is not known.

Yours Sincerely.

RE: Planning Application 2017/5172/P
Mobile Phone Masts 1 Winifrede Paul House York Rise LONDON NW5 1DX

Dear Camden Council Planning,

I strongly object to the installations of mobile phone masts on Winifrede Paul House. The installation of the base phone masts will literally be right opposite my home and around 10 meters away from my bedroom and living room. It will be a physically intrusive structure.

I'm suffering from Cancer and now almost blind. I'm seriously concerned for my health and well being with my cancer battle. The installation of these Masts no one really knows the long term effects as it's divided opinions from all sides. From what I've read it can cause Cancer and I'm fearful and don't want this jeopardising my health any further by the phone masts being installed.

I strongly urge for Camden Council Planning to reject the proposal of the installation for the points I have raised.

Yours sincerely,

Mrs Carole Owens

51 Twisden Road,
NW5 1DL
21st Dec. 017

Dear Sir,

To Whom it may concern

I have been informed that phone masts are to be put up on a roof-top at the bottom of York Rise, turning into Churchill Rd. I would get a view of this.

I strongly object to this happening as the statistics prove how dangerous to people's health, these phone masts are.

I trust & hope that this can be avoided at all cost.

Thankyou,

Yours sincerely,
