2017/6064/P	Belsize Residents Association, Sanya Polescuk	8a Belsize Court Garages	03/12/2017 16:00:43	OBJ	The proposed Standard UK GRP design for this electricity substation, a proposed outbuilding in Conservation Area is entirely inappropriate. The argument that the building won't be visible from a public highway and therefore its design not required to follow Conservation Area guidelines is misplaced. The building will be visible from the semi-public courtyard of the fine art-deco mansion block in a middle of the Belsize Conservation Area and should follow design guidelines like any other new small building proposed for the area.
