Please provide a full description and/or list of the materials/details that are being submitted for approval:

Condition 4a:

Photo submitted showing the Guestling Red sample panel pointed with a penny role finish technique in hydraulic lime. The bricks are imperial in size, however can slightly vary due to the process of being handmade. The extent at which each brick can curve is much less than previous samples, which is an advantage when meeting the brick courses in line with the stone quoins. The pointing is from LimeTec and is the darkest shade of hydraulic premixed black LimeTec produce. The pointing on the building seems to show that the penny struck technique was originally use.

Condition 8:

Method report from PAYE detailing the Jos-Torc cleaning system.
