

Dear Sir/Madam,

I would like to object to the Gondar Gardens reservoir scheme. I think it is inappropriate to have luxury care homes with no affordable housing. I think it is very inappropriate to have such a large scale complex with commercial concerns in a residential area. The pressure on parking etc is great already and will lead to impossible pressures on the residents. I think it is inappropriate to have no green space allowance with access possible by local residents. Finally, as has been well documented, I think it is inappropriate to build on a natural habitat for the slow worm.

Regards
Laurence
