

dear sirs

I object to the above application which should be rejected because :

A-it will destroy the habitat of the protected slow worm , and red listed birds

B-remove a rare green lung in an overdeveloped urban area

C-Excessive bulk /footprint and out of keeping with the area--height

D- no affordable homes

E-create air, noise and light pollution in an unusually peaceful area

F- generate excessive traffic levels and demand for parking from visitors /deliveries to the site

yours sincerely
