14 December 2017

Dear Sir/Madam

DECISION

Town and Country Planning Act 1990 (as amended)

Householder Application Granted

Address:
2 Glenilla Road
LONDON
NW3 4AW

Proposal: Installation of 2 condenser units at rear 1st floor level.

Drawing Nos: Site location plan; Existing First Floor Plan; Proposed First Floor Plan; Existing Rear Elevation; Proposed Rear Elevation; Plant Noise Assessment by Anderson Acoustic dated October 2017; Manufacturer Details (installation Manual, Operation Manual, Floor Standing Unit).

The Council has considered your application and decided to grant permission subject to the following conditions:

Conditions and Reasons:

- 1 The development hereby permitted must be begun not later than the end of three years from the date of this permission.

Reason: In order to comply with the provisions of Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 All new external work shall be carried out in materials that resemble, as closely as possible, in colour and texture those of the existing building, unless otherwise

specified in the approved application.

Reason: To safeguard the appearance of the premises and the character of the immediate area in accordance with the requirements of policy D1 and D2 of the London Borough of Camden Local Plan 2017.

- 3 The development hereby permitted shall be carried out in accordance with the following approved plans; Site location plan; Existing First Floor Plan; Proposed First Floor Plan; Existing Rear Elevation; Proposed Rear Elevation; Plant Noise Assessment by Anderson Acoustic dated October 2017; Manufacturer Details (installation Manual, Operation Manual, Floor Standing Unit).

Reason: For the avoidance of doubt and in the interest of proper planning.

- 4 Noise levels at a point 1 metre external to sensitive facades shall be at least 10dB(A) less than the existing background measurement (LA90), expressed in dB(A) when all plant/equipment (or any part of it) is in operation unless the plant/equipment hereby permitted will have a noise that has a distinguishable, discrete continuous note (whine, hiss, screech, hum) and/or if there are distinct impulses (bangs, clicks, clatters, thumps), then the noise levels from that piece of plant/equipment at any sensitive façade shall be at least 15dB(A) below the LA90, expressed in dB(A).

Reason: To safeguard the amenities of the adjoining premises and the area generally in accordance with the requirements of policies D1 and A1 of the London Borough of Camden Local Plan 2017.

- 5 Prior to the commencement of the use of the plant equipment hereby approved, the equipment shall be fitted with the acoustic mitigation measures in accordance with the recommendations of the Plant Noise Assessment by Anderson Acoustic (dated October 2017) hereby approved. All such measures shall thereafter be retained and maintained in accordance with the manufacturers' recommendations.

Reason: To safeguard the amenities of the adjoining premises in accordance with the requirements of policy G1, A1, A4, CC1 of the London Borough of Camden Local Plan 2017.

Informatives:

- 1 Your proposals may be subject to control under the Building Regulations and/or the London Buildings Acts that cover aspects including fire and emergency escape, access and facilities for people with disabilities and sound insulation between dwellings. You are advised to consult the Council's Building Control Service, Camden Town Hall, Judd St, Kings Cross, London NW1 2QS (tel: 020-7974 6941).
- 2 Noise from demolition and construction works is subject to control under the Control of Pollution Act 1974. You must carry out any building works that can be heard at the boundary of the site only between 08.00 and 18.00 hours Monday to Friday and 08.00 to 13.00 on Saturday and not at all on Sundays and Public

Holidays. You are advised to consult the Council's Noise and Licensing Enforcement Team, Camden Town Hall, Judd St, Kings Cross, London NW1 2QS (Tel. No. 020 7974 4444 or search for 'environmental health' on the Camden website or seek prior approval under Section 61 of the Act if you anticipate any difficulty in carrying out construction other than within the hours stated above.

3 Reasons for granting permission.

The proposed condenser units would be sited at the rear and would be positioned on the balcony at first floor level. The units are modest in size and would not project above the height of the balcony. Due to its location, the proposed unit will not be visible from street level or from the rear garden. Given its siting and overall size, the proposed unit would not have a negative impact on the host building or the surrounding Belsize Conservation Area.

In terms of amenity, the proposed unit would have no impact to either side of neighbouring properties due to the positioning of the properties and the units proposed.

The Council's Environmental Health Noise Officers have stated that the submitted acoustic assessment has proposed noise mitigation as required for the installation and therefore they raise no objections to the installation. Conditions would be added to secure the mitigation measures and to protect the amenity of occupiers.

No comments have been received prior to making this decision. The site's planning history was taken into account when coming to this decision.

Special attention has been paid to the desirability of preserving or enhancing the character or appearance of the conservation area, under s.72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act 2013.

As such, the proposed development is in general accordance with policies A1, A4, D1 and D2 of the Camden Local Plan 2017. The proposed development also accords with policies of The London Plan 2016 and the National Planning Policy Framework 2012.

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraphs 186 and 187 of the National Planning Policy Framework.
