**Ted Baker redevelopment – Camden**

Dear Sir/Madam

As a nearby resident of this building I write to object to the above development as it stands. The development will take the canal frontage to an unprecedented height and will change the character of the canal irreversibly. It also misses several opportunities to connect the operational side of the canal with the surrounding roads and the current plans will reduce the canal to an ornamental water feature rather than a major component of an integrated transport strategy.

I would be pleased if you would acknowledge receipt of this objection.

Regards

Christine Dystant
