

Sir/Madam

I have been unable to submit comments on Application 2017/6655/P relating to 60 Canfield Gardens via the planning website because the 'comments until' section has a date earlier than the date when the application was registered. This seems to be a very frequent occurrence and reduces the likelihood of people submitting comments. Does it also mean that people don't get electronic alerts as there is no comment period?

The application relates to enlarging a first floor external rear terrace due to permission having been granted for an increased size extension to the ground floor level.

It was a specific constraint in the decision letter giving approval for the enlarged extension (application 2017/3212/P) that 'the roof of the extension hereby permitted, other than the area designated for the terrace, shall not be used as a roof terrace/balcony' in order 'to prevent unreasonable overlooking of neighbouring premises....'

This means that this new application should be refused by Camden since there was a clear position from Camden only two months ago saying use of the new extension roof would be prevented from use as a terrace or amenity area.

I trust that Camden will uphold this and refuse the application which if granted would cause even further overlooking of neighbouring gardens including into properties and gardens on Compayne Gardens.

Please acknowledge receipt of this email.

Kind regards  
Lucy
