6. Tree Preservation Order Details

If you know which TPO protects the tree(s) enter its title or number below

--

7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes). Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

Front right

T1 Lawsons Cypress x 1 (*Chamaecyparis lawsoniana*) Grayswood pillar variety. The tree is encroaching on the flats. It is the tree you see as you drive in and as such, we don't want to alter its shape too much. The climber must liaise with Adriatik prior to commencing the works. The suggested works are: To remove x 1 low branch nearest the building, trim back from the windows by up to 0.5m, trim remainder lightly to shape and contain.
West end lane frontage, over the bus stop.

T2 Lime x 1 (*Tilia* spp) Mature tree. There are x 2 large pieces of deadwood over the bus stop and footpath. The suggested works are: To remove the two pieces of deadwood.

Rear left

T3 London Plane x 1 (*Platanus x hispanica*) Very large, mature, previously reduced tree. The tree overhangs the garages and the neighbouring school playground. The work will have to be carried out over the Christmas holiday period to avoid any disruption to the school. To contain spread and to reduce the moisture uptake, the suggested works are: To reduce the overall height and the lateral spread all round by 3 - 4m back to the most recent points of reduction, retain shortened furnishing growth (where possible) for crown continuity, remove deadwood.

Rear, neighbours

T4 Ash x 4 (*Fraxinus excelsior*) Early mature to mature trees. The trees belong to the school and they have reduced the lateral spread that affects the playground but haven't touched the opposite side. To maintain balanced crowns and to reduce the extent of the overhang, the suggested works are: To reduce the overhanging lateral spread back by 2 - 2.5m.

8. Trees - Additional Information

For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.

For works to trees covered by a TPO

Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application must be accompanied by the necessary evidence to support your proposals. (See guidance notes for further details)

If YES, you are required to provide written arboricultural advice or other diagnostic information from an appropriate expert.

Written technical evidence from an appropriate expert, including description of damage and possible solutions.

Documents and plans (for any tree)
