2017/5697/P	Caren kuendig	45 Agamemnon road London NW6 1EG	06/01/2018 18:28:01	OBJLETT ER	<p>Dear Lisa McCann,</p> <p>We were unable to add a comment on the planning application (reference: 2017/5697/P) via the Camden website because the comments deadline appears to have expired before the planning application was submitted (is this a system error?)</p> <p>We are the owners of 45 Agamemnon Road, NW6 1EG (direct neighbour of 43 Agamemnon Road). We have looked at the above planning application and believe it would have a significantly negative impact on our property (including the loss of natural light) and the general appearance of the neighbourhood.</p> <p>In particular, we have the following objections:</p> <p>1) roof height on party wall: we object to the planned roof height exceeding the height of the current party wall. In essence, we believe there should be equal treatment concerning wall height between our planning application (2015/4079/P) and the proposed works at 43 Agamemnon Road. In the current drawings the planned extension wall significantly exceeds the current party wall which would lead to considerable loss of natural light along much of the extension.</p> <p>2) sloping instead of flat roof: we would prefer the extension to be built using a sloping roof rather than a flat roof. This would be in keeping with the current conservatory at 43 Agamemnon Road and our own extension. In addition, it would be of a similar design to that of other extensions in the neighbourhood.</p> <p>Could you please confirm that you have received this email and that our objections will be considered?</p> <p>Many thanks</p> <p>Caren and Christian Kuendig</p>
2017/5697/P	L A Russell	41 Agamemnon Road London NW6 1EG	06/01/2018 20:04:49	COMMNT	<p>This application would have a significant negative impact to my property due to the proposed height of the party wall leading to significant loss of light, the proposed roof height exceeds height of current party walls and all party walls should be the same height.Planned extension wall exceeds current party wall. Proposed height of party wall and flat roof will exceed height of my own conservatory walls and roof blocking out light. Both my conservatory and others have sloping roofs. This proposed plan is not in keeping with other extensions in this neighbourhood and will lead to loss of privacy..</p>
