2017/6226/P	Selina Nelte	2 Sarre Road	10/01/2018 16:40:28	OBJ	<p>I have strong objections to this planning permission on the following grounds: 1) I believe that the plans do not clearly outline by how much the property will be extended (both in length and height) and from what is visible at the moment I believe that it is likely to have an impact on the light to my property. In winter in particular with the sun laying quite low it is already hard to get day light given the current height of the properties on Mill Lane and that one in particular. I feel that we have not been consulted adequately other than noticing a notice on a tree on the road once we came back from our Christmas break.</p> <p>2) The property and others on Mill Lane on that corner have significant waste issue which will be exacerbated if you increase capacity to the property. It is excessively difficult to walk safely with kids on this stretch of Mill Lane as bins are overflowing and conditions on the street are bad.</p> <p>3) Please be aware that a stretch of wall has been taken down which outlined the boundaries of my property as the person we bought the property from had put up fences that did not make full use of the boundary for aesthetic reasons. I would like it to be clear that these boundaries do not get overstepped by the redevelopment to the rear of the new property.</p>
