Planning application 2017/5071/P

Dear Ms Craig

We are writing in follow up to our objections to the planning application relating to ORT House. In that submission we expressed our serious concern about the way the planning application had been handled. The proposals would have a serious and adverse effect on our property and on those of our neighbours in Arlington Road and yet none of us had received directly any information from the Council about the proposals. We do not think properties affected in Parkway were informed either. This suggested to us that those handling the application had not registered the nature of what was being proposed and its potential impact. We are writing to seek reassurance from you that, as this application is taken forward, this situation is rectified and that Council officers ensure that they have a proper understanding of our concerns.

Yours sincerely
