

## Your Requirements:

Customer is currently experiencing issues with people hanging around and loitering outside property. has contacted police and local council and has been advised to make sure walkway/parking area is illuminated to deter these individuals.

Would like lighting before moving to cameras.

Area required is in between local secondary schools and council estate.

during visit, clear to see youths would like to congregate in area

## Our Recommendations:

4 motion activated lights

Lights to be located within shrubbery between property and pavement.

4 poles each approx 4 meters in height with PIR lights on the top

the security light should detect motion over 180° range and automatically lights when movement is detected.
