Dear Sir/Madam

I am a long-time resident at number 10 Belsize Lane (23 years) and keep abreast of planning developments in the area.

I am supportive of the application and the proposed development and design at No. 24 Belsize Lane - the building is visible from my back garden. I have witnessed several renovations over the years. This seems relatively modest compared to some of the transformational changes.

The proposed extension is modest as it only goes as far as the main building line consistent with the other buildings on Belsize Lane, significantly improves on the design and appearance at back of the property and removes overlooking which previously occurred due to the sideways facing windows in the current extension. I have no issues with the proposed balcony as this feature is consistent with all the other adjoining properties.

Yours truly

Mr. S Datta
