Dear Matthias,

As discussed on site the above drawings have the edits on them for clarity. Please note all the drawings submitted via portal have notes on them identifying the cameras as illustrative only. If there is any further comments please let me know.

In addition to the above I have attached an example of the 4mp bullet camera, for sizes. This is the size of camera we are aiming for however this is only an example of what we will be exploring with different manufactures also being looked at.

Thanks,

Will Carter
