

Application No:	Consultees Name:	Consultees Addr:	Received:	Comment:	Response:
2018/0116/P	Paul Fineberg	22b Winchester Road	13/02/2018 23:11:07	OBJLETT ER	Please refuse this application for installation of an air source heat pump. Such devices make very significant noise and the device will shatter the peace of the neighbourhood. The promise of a sound reducing enclosure is made by the applicant, which begs the question why is such necessary ? These devices are unproven and are very noisy. The heat pump device is therefore wholly unsuited for use in the conservation area neighbourhood because it will cause injurious noise nuisance to neighbours.
2018/0116/P	Ruaridh Macdonald	24 Winchester Rd	14/02/2018 08:06:06	OBJEMAI L	Please refuse this application for installation of an air source heat pump. Such devices make very significant noise and the device will shatter the peace of the neighbourhood. The promise of a sound reducing enclosure is made by the applicant, which begs the question why is such necessary ? These devices are unproven and are very noisy. The heat pump device is therefore wholly unsuited for use in the conservation area neighbourhood because it will cause injurious noise nuisance to neighbours.
2018/0116/P	Ljiljana Macdonald	24 Winchester Rd London NW3 3NT	14/02/2018 08:08:31	OBJEMAI L	Please refuse this application for installation of an air source heat pump. Such devices make very significant noise and the device will shatter the peace of the neighbourhood. The promise of a sound reducing enclosure is made by the applicant, which begs the question why is such necessary ? These devices are unproven and are very noisy. 2018/0116/P	Paul Fineberg	22b Winchester Road	13/02/2018 23:18:50	OBJLETT ER	The area of green cover shall not be reduced from that permitted. The site was historically made up of the rear gardens of four Winchester Road houses until these were sold off for speculative development more than twenty years ago. The maximum amount of green space should be maintained for reasons of bio-diversity and the safeguarding of the green outlook of the Conservation Area, of which the site forms a part.
