Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

T1 pine: too big for the location. Propose to reduce crown profile by about one foot all around, and thin out the remaining crown by about 25%.

T2 ginkgo: getting too tall and with an ultimate height of 100 feet, propose to reduce height by about 1.5m.

T3 birch: has responded strongly to previous reduction. Propose to reduce to previous reduction points and thin out the remaining crown by about 25%.
