Registered in England No. 1106549

Planning Condition 14

The ventilation system for the above project has been designed such that all fresh air inlets have been positioned at roof level away from busy roads. As much as it practically possible, AHU (Air Handling Unit) inlets and outlets have also been positioned away from one-another to prevent the stale/dirty air from the building contaminating the fresh air supply.

Signed for and on behalf of Briggs & Forrester Engineering Services Ltd,

Curtis Castledine
Assistant Mechanical Design Engineer

URS is a member of Registrar of Standards (Holdings) Ltd.
