2017/4885/L	Nicholas French	56 Pilgrims Lane	03/03/2018 14:53:27	COMMEM PER	If planning permission is granted, it would be good if the building were to have a green roof of the type similar to the two neighbouring properties with garden houses on the left of 22, looking from the house. The houses in Pilgrims Lane look down on the gardens in Downshire Hill and the green roof buildings make a huge difference in terms of minimising the urbanisation of the strip of land at the back of the Downshire Hill gardens compared to those buildings without green roofs, since the outlook remains green rather than asphalt or other man made materials. Also better for the wildlife I imagine. On that basis we are relaxed about the building.
