2018/0179/P	Ruari MAcdonald	24 Winchester Rd	08/03/2018 14:31:51	OBJEMAI L	<p>Please refuse the proposed specification of glass balustrades for the external garden areas around the extensive lightwell voids, staircases, and other level changes. Glass would be materially inappropriate being at variance with and uncharacteristic of the established patterns of the Conservation Area (CA). When viewed from the surrounding houses, some of them Grade II listed, glass balustrades snaking around the garden would be at disturbing material and design variance from the characteristic norm of painted iron balustrading in the CA. The proposals risk catching the eye in distracting, unexpected and unwelcome reflections on surrounding properties. Please require the development balustrading to be of open black or dark grey painted iron as is typical of the neighbourhood.</p> <p>objection to any garden walls constructed of red brick, which the applicant shows in a reference photograph of another garden, when they seek discharge of a condition relating to use of reclaimed London stock brick for the body of the house they are constructing. Use of London stock brick for the house as well as any garden walls or other structures would be more harmonious. Use of red brick in or around the garden would be unnecessarily jarring.</p> <p>objection to any garden walls constructed of red brick, which the applicant shows in a reference photograph of another garden, when they seek discharge of a condition relating to use of reclaimed London stock brick for the body of the house they are constructing. Use of London stock brick for the house as well as any garden walls or other structures would be more harmonious. Use of red brick in or around the garden would be unnecessarily jarring.</p> <p>We also have an objection to any garden walls constructed of red brick, which the applicant shows in a reference photograph of another garden, when they seek discharge of a condition relating to use of reclaimed London stock brick for the body of the house they are constructing. Use of London stock brick for the house as well as any garden walls or other structures would be more harmonious. Use of red brick in or around the garden would be unnecessarily jarring.</p>
