| 2016/3386/L | Jenny Stevens | 17 Rudall Crescent | 11/03/2018 14:17:31 | OBJ | <p>The new plans are a considerable improvement on the previous ones. However the rear elevation of this Grade 2 Listed property is much more significant than the front elevation, exposed as it is and very visible from Martys Yard, and from many properties in Gayton Road, and Rudall Crescent (including my own). The proposed extension at top floor level involves replacing the existing window design with something very different from the existing. Why could not this new added room have exactly the same design of windows as the existing. This would be much more appropriate and acceptable on such a special and prominent building. Also no basement impact assessment has been provided and should have been, given the position of this property and its relation to the neighbouring properties on either side.</p> |
