Constantinescu, can you please acknowledge the safe receipt of my email below and revert back to me at the earliest opportunity.

Andrew, did you come and visit the site today?

Dear Constantinescu

Thank you for the prompt reply.

As I have mentioned to Andrew we are extremely disappointed by Camden Council's lack of communication regarding the major works particularly in relation to the planning/design of the pipes above our front door and on our exterior wall which have turned the front of our flat into an industrial sight. Correct me if I'm wrong but under the Party Wall Act 1996 section 2 Camden Council has a duty to issue a notice clearly detailing the proposed work? You have written 'notice has been provided to all the persons interested in the land'? Please provide us copies of the relevant documentations that were sent to us as we have not received any correspondence regarding this issue.

You have also mentioned 'planning alerts have been sent to the residents which signed up for it'. We were not previously made aware that planning alerts existed. Why has Camden Council failed to inform us that this service was available to us?

As you can see from the attached picture the works has already started. We object the current design and do not wish for any pipes to run above our front door or on our exterior wall. This issue has caused

me and my family great distress and needs to be resolved at the earliest opportunity.

The attached picture is of our front door.

Regards

Twana
