2017/5497/P	Mr A Heard	UK Power Networks Unit 27 Wedgewood Way Stevenage Hertfordshire SG1 4QF	21/03/2018 15:23:39	INT	The proposals cover three substations located at this site so the relocation and larger implications on the electricity network need to be considered as part of this development. UK Power Networks needs to be approached as early as possible to discuss the plans and design for the electricity demand for the scheme along with the wider network.
