

OBJECTION TO PLANNING APPLICATION 2018/1231/T

A developer has put in a planning application to cut down a tree in the garden of 8 Frogna, to build a 'structure' in the garden. This tree and indeed the garden is in the conservation area of Redington/Frogna, borough of Camden and special consideration should be given to preserving the environment in a conservation area. The tree forms an important part of the landscape and there is no reason why a developer should be allowed to chop it down against the wishes of long term residents. As a council you have made a commitment to a greener Camden and sites of nature conservation and biodiversity, we expect you to honour this in your actions and reject this wholly unnecessary planning application that has no social benefit. We need you to support your commitment to preserving the environment in this conservation area.

We strongly oppose this wholly unnecessary planning application because we are committed to preserving the architectural heritage and beauty of Hampstead. We believe residents voices should be listened to and we urge the council to reject planning application 2018/1231/T
