2018/1135/L	Louis Berk	52 Kentish Town Road NW19PU NW19PU	18/04/2018 07:43:46	OBJ	Firstly, this planning application is incorrectly named. The extent of the work is not just the simplistic replacement of steps but involves significant landscaping of the front area and removal of walls some of which are adjoining to our property. The fact that the application fails to make this clear is immediately of concern. Secondly, as already mentioned the works as described involves walls which are party walls and this has also not been recognised in the application. Finally, the last time Camden Council did works to the properties either side of our property it lead to significant disruption to our lives and environment and in the end required the intervention of our local councilor and a meeting with a senior council executive member in order to repair the damage to our environment and our house. In short, Camden Council cannot be trusted to carry out works which do not damage the environment and homes of private residents next door. Until a party wall agreement is in place and a committed project plan (with penalties for lateness) are in place I completely oppose this planning application.
