2018/1477/P	Florence Bhose Lafon	33 Mackeson Road London NW3 2LU	18/04/2018 22:44:29	SUPPEM ER	As immediate neighbours, at 33 Mackeson Road, we support this planning application wholeheartedly. The addition of enlarged timber clad box planters around the perimeter of the approved roof terrace and the eventual plants and flowers grown in them, would bring colour to the rooftops, would hopefully encourage environmentally friendly wildlife such as bees and would be a pleasure to look at from our garden. We are sure the planters would be tasteful and unobtrusive and would urge you to allow this application.
2018/1477/P	Honor Bates	86 Constantine Road London NW3 2LX	23/04/2018 17:03:13	COMMNT	I live at 86 Constantine Road and look onto the North side of the proposed terrace. I have no problem with the planters being slightly higher and wider than originally drawn and feel the additional planting will enhance all views towards the terrace.
2018/1477/P	Juliet Jefferson	76 Constantine Road	24/04/2018 09:02:28	COMMNT	As work continues on the approved roof terrace I am surprised that Camden would allow structures of this size in a conservation area.
2018/1477/P	Sarah Grace Clark	Flat 1 29 Mackeson Road London NW3 2LU	23/04/2018 20:25:21	SUPPRT	We are fully in support of the proposed plan for the roof terrace at 31 Mackeson Road that includes built in planters. Growing plants in residential outside spaces is encouraged by Camden Council as shown but this statement on their website "We want to encourage as many people as possible to use any space they have to grow plants either to help wildlife, eat home grown food or simply to learn about the pleasures of gardening" which we fully support. We support them being built-in planters, both from a safety point of view and aesthetically. We have no issue with the size of the planters which need to be large enough to sustain the growth of the plants and will be at a lower elevation than the original chimney stack.
2018/1477/P	Keith Price	34 Cressy Road London NW3 2LY	18/04/2018 17:33:51	OBJ	We object most strongly to this new application and in particular to the inappropriate and oversized screen and planter, which have now been installed. These do not conform to other rooftop designs in the adjacent area and, consequently, draws attention to the bulky and intrusive nature of this unacceptable development.
