

85mm high cast bronze letters for Piggott Room, Manuscripts reading room, Level 2

The bronze letters for the Piggott Room sign will be provided with 3mm diameter dowels for attaching to the GRG plaster wall face. Small holes will be drilled in the plaster for the dowels to be fixed using appropriate adhesive. This fixing method has been used successfully elsewhere in the building – see following photos of ‘Philatelic Collections’ sign in Front Hall on UGF.

Existing sign with 85mm high cast bronze letters
fixed to plaster wall lining
