

**London**  
**Published 1895**

**Source map scale - 1:1,056**

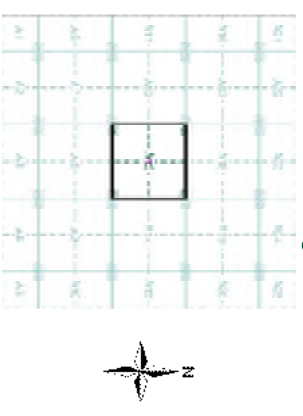

The 1:1,056 scale of Ordnance Survey mapping was adopted from Ireland in 1848 and was used to survey towns with a population of over 400, plus smaller towns and villages with a population of over 100, plus a further scale in 1841-45. The scale was the largest scale at which London was mapped by the Ordnance Survey, and a skeleton survey of the capital, showing little more than streets, street names, fortresses and altitudes, was undertaken between 1848 and 1850. The majority of the 1:1,056 surveys were later replaced by 1:500 surveys; although almost all the remainder were revised at this scale, sometimes more than once before 1895. The type of detail shown on the 1:1,056 scale is broadly similar to that on 1:500, the apparent omission of minor details such as sewer access points and street names is due to the scale of the generalised street plan, as opposed to the detailed specification of the map.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940s. In 1954 the scale was changed to 1:25,000 for the whole of Great Britain. The maps shown here covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Published 1938

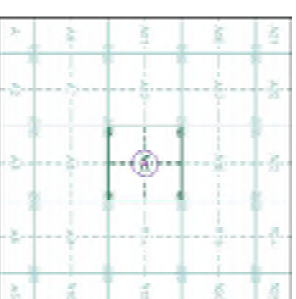

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the Ordnance Survey introduced the Cassini Projection, which was used to update the 1:10,560 maps. The maps shown here were therefore often some years later than the surveyed data. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were finally overprinted with the National Grid, in 1970. The first 1:10,560 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

### Ordnance Survey Plan Published 1954

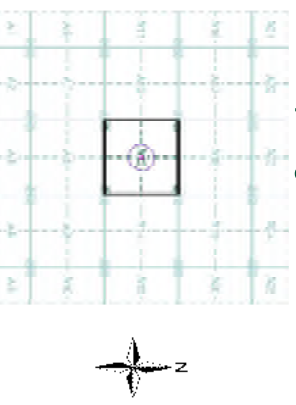

Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940s. In 1954 the OS maps were reissued at a scale of 1:1,250. The maps shown here cover the whole of what were considered to be the defined parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

### Historical Aerial Photography Published 1946

Source map scale - 1:1,250

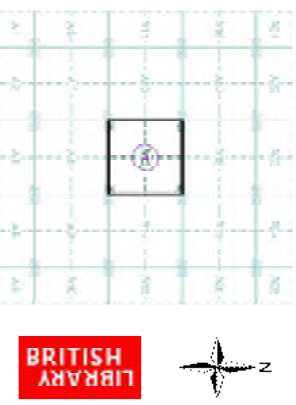

The historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:2500 as an aerial photography. They were prepared between 1944 and 1951 as a result of the preparation of conventional mapping, due to post war resource shortages. New security measures in the 1950s meant that every photograph was rechecked for potentially unsafe information with security sites replaced by fake fields or dunes. The original editions were withdrawn and only later made available after a period of fifty years although due to the accuracy of the editing, without viewing both revisions it is not easy to spot the edits. Where available Landmark have included both revisions.

**Additional SIMS  
Published 1955**

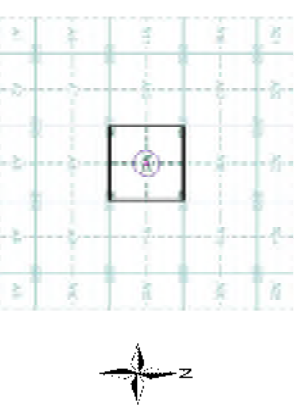

**Source map scale - 1:2,500**

The SIM cards (Ordnance Survey's Survey of Information on Microfilm) are further, more editions of mapping which were produced and published in 1994, and contain detailed information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.
