4. Trees Ownership

Is the applicant the owner of the tree(s)? ☒ Yes ☐ No

5. What Are You Applying For?

Are you seeking consent for works to a tree(s) subject to a TPO? ☐ Yes ☒ No

Are you wishing to carry out works to tree(s) in a conservation area? ☒ Yes ☐ No

6. Tree Preservation Order Details

If you know which TPO protects the tree(s) enter its title or number below

7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

*E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.*

Rear Garden:  
Sycamore: Approximately 23.00m. Thin crown density throughout by 20%. It is essential that branch ends are thinned to ensure balanced and healthy crown structure. Judiciously raise crown by approximately 1.50-2.00m and remove dead wood. Reduce one extraneous branch growing over property to the rear by approximately 1.00-1.50m back into main crown structure. Reasons - increase light levels, help abate nuisance, help reduce potential hazards, help reduce leaf area without causing thick-fast regrowth and help to curtail the tree's sphere of influence whilst preserving the tree's natural characteristics and aesthetic value.  
Eucalyptus: This young tree is growing close to the left of the sycamore and is now getting rather tall. It has the potential to exceed the height of the sycamore tree within 10 to 12 years. Reduce main branch leader by approximately 40% back into main crown structure and reduce remaining crown by approximately 20-25% to balance and regular maintenance.

## 8. Trees - Additional Information

### For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.

### For works to trees covered by a TPO

Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application must be accompanied by the necessary evidence to support your proposals. (See guidance notes for further details)
