

**2** S05 - F0 Entrance gate section detail  
1 : 5

**GATE:**  
Mild steel fully welded gate. All steel fully coated in RAL 8019 protective paint / powder coating. Contractor to provide shop drawings for approval by architect.

50x50 6.3mm steel SHS vertical gate posts set into brickwork at sides, concrete lintel at top, and concrete pad foundations at base. Fixings shown indicatively.

50x30mm 6.3mm steel RHS top frame

19mm dia bespoke dimension Allgood stainless steel pull handles.

25x8mm steel flats creating vertical bars to rear of each timber fin. Timber fins secured with countersunk screws every 200mm

100x25mm Austiran larch timber fins from Profi Holz

50x8mm steel flat creating horizontal stiffening rail

10mm woven steel mesh welded between vertical flats

50x30mm 6.3mm steel RHS bottom frame. Bottom of gate (including timber fins) sloped to match slope of paving along the mews (~2deg, to be measured by contractor on site). Contractor to ensure gates clear paving throughout their full range of possible movement.

Siena straight brick pavers

10mm silicone expansion joint (heavy duty for domestic vehicle traffic) with foam backing

Paving edge profile

To be read in conjunction with A.G70.D01, D05 and D07

1. Use figured dimensions only
2. Do not scale from this drawing
3. All dimensions to be checked on site and the Architect to be informed of any discrepancies before construction commences

4. All references to drawings refer to current revision of that drawing.
5. Structural and services information shown is indicative only. Refer to consultants' drawings for details and setting out.
6. All work and materials to be in accordance with current applicable statutory legislation and to comply with all relevant codes of practice and British and European standards
