Subject: Update on Smells

Hi John and John

I just submitted my Kitchen Smell Complaints diary to Environmental Health who only seem to want to hear about NOISE.

However, I did log it with them:

April 7: 6:45 - and on for some hours

April 8 Saturday - kitchen smells throughout the day (whenever I went on my balcony or near my open windows)

April 19: (another hot day): 4:30 and noticed again at 6:25.

April 20: today starting at 5:15. (Spoke with Felix: he is smelling it now, too.)

I am even smelling the food over at my desk which is across the room from my Deliveroo side windows.

Not nice!

Cheers

Edie

p.s. please let me know if you get to conduct noise tests this Sunday.

p.p.s. It's 8:10 and the smells of Oriental cooking are overwhelming! They are coming in to my living room when I wasn't even thinking about them!

I suddenly realised that my house was filled with this smell!

Who knew over the cold winter months that these horrible intrusive smells would become a major problem!

I invite you to sit in my living room and breathe in. Unacceptable that I and others have to live with this!
