Proposed Garden Pod – 41 Nassington rd

Installation

An area of 250cm diameter is required for the seater to rotate freely. A hard standing base of no less than 137cm diameter is required to build your sphere onto. Your sphere can be installed onto a level paved, concrete or decked area.

Ground Preparation

If you are preparing a new concrete or paving area for your seater, we recommend an overall depth of 30cm allowing 7 days for the ground to settle prior to the arrival of our fitting team.

Dimensions

- Height: 226cm
- Width: 236cm
- Base area diameter: 140cm
