Dear Jeremy,

## **RE: 62 Fognal London NW3 – Extension of Basement**

We enclose a copy of a revised drawing in respect of the current tender package. The Engineers have deemed it sensible to add a small area of new basement to the rear left hand corner of the current excavation site. This is to enable the full footprint of the room above to be supported by the basement concrete.

Also the Engineer has highlighted areas of line load that need to be addressed in the design of the basement roof slab. I hope this can be addressed by your own engineering.

We look forward to hearing from you soon.

Yours sincerely

**S A Judd**
