Informative(s):

- 1 Reason for granting consent

The proposed externally illuminated signs are considered acceptable in terms of size, location and method of illumination as they respect the architectural features of the building, are sympathetic to the host building and surrounding area and have an appropriate number of signs per elevation. In the wider street scene, the signs would not be considered to cause harm to the visual amenity of the immediate locality, which is a mix of commercial and residential in character and they would be considered to preserve the character and appearance the West Kentish Town Conservation Area.

Whilst the advertisements will have some impact in terms of light spill, the illuminated signs are mostly in a typical position, replace the existing signs and are at a low level of illumination. Therefore, they are not considered to disturb neighbouring residential occupiers. In terms of size, siting and method of illumination the proposal is not considered detrimental to highway safety. Whilst not in a typical location, the high-level lettering signs are non-illuminated and would only be viewed by road users at a distance, which is not considered to cause a

distraction. On balance, they are not considered hazardous to road users raise no public safety concerns.

No objections have been received prior to making this decision and the site's planning and relevant enforcement history has been taken into account when coming to this decision.

Special attention has been paid to the desirability of preserving or enhancing the character or appearance of the Conservation Area, under s.72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act (ERR) 2013.

As such, the proposed development is in general accordance with policies A1, D1, D2, D3 and D4 of the Camden Local Plan 2017. The proposed development also accords with the policies of the London Plan 2016 and the National Planning Policy Framework 2012.
