1

particular, the authors note that the results of the present study are consistent with the findings of other studies that have shown that the use of a computer-based system for the management of a patient's care can lead to a reduction in the number of errors and a reduction in the time taken to complete the task. The authors also note that the use of a computer-based system for the management of a patient's care can lead to a reduction in the number of errors and a reduction in the time taken to complete the task.

24. Does it make sense to say that a person is *not* a person if he/she is a *not*-person? (This is a question about the logic of negation.)
