My enquiry is

Late objection for planning application (ref: 2018/0901/P)

In addition to the objections made by Kilburn Neighbourhood Forum and Ms.Fernandez, I would also like to object to the proposed development. I live at this location, 240 Kilburn High Road, I understand the streetscape of this location well. I have Health & Safety, Streetscape and Crime & Disorder concerns for installing the proposed telephone kiosk.

1. Crime & Disorder: I welcome the proposal to remove the 2 existing telephone kiosks. At present, these act as an anti-social spot for urination and criminal behaviour. However, one can still see through the panels of the telephone kiosks to identify individuals in time. The New World Telephone kiosk is solid, you cannot anticipate if someone is hiding behind it as the proposed design is perpendicular to the highway. This concerns me greatly. I really do not want to get mugged less that 8 feet from my own door. Stabbings have occurred recently just 15 feet from 240 Kilburn High Road.

2. Streetscape: This is additional street clutter. This goes against TfL and Camden Councils aim to reduce street clutter. The proposed location is very close to a road sign, this road sign is the on street bin collection point for some businesses and many private residences (flats). Rubbish piles up here until collection, the proposed kiosk is too close, the rubbish will be at its base.

3. Health & Safety: The layout of the proposal, perpendicular to the highway is distracting for vehicles, increasing the danger on an already dangerous road.

Thank you for reading my objections.
