2018/0423/P	Emily Simon	23/05/2018 11:12:24	OBJ	It appears that this extension intrudes far into the garden and in close proximity to the railway tunnel. the vibration and noise passing will impinge on this extension. Also, we have had problems with flooding occurring on gardens in such close proximity to the railway tunnel. This is important not only to number 10, but to us right across the road whgo may be impacted by these water levels. This is an ill advised extension.
